

Dear FCC:

It should not be up to the national association of broadcasters to dictate what I am permitted to hear! I want to be able to listen to weather and traffic information on my XM Satellite Radio. Please reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that helps so many motorists such as myself. Specifically, the ability to be able to easily and consistantly be able to check local weather and traffic conditions is essential for today's traveller!

Thank You.

Randolph R. Lehman
